

# SPECTROPHOTOMETER CM-2600d

Portable, Compact, Easy to Use Performs Like a Desktop Spectrophotometer

World's first portable spectrophotometer equipped with automatic UV adjustment function.

Advanced Numerical UV Control dramatically reduces evaluation time.

# The CM-2600d is a portable integrating sphere spectrophotometer designed for versatility in various applications.

## Simultaneous measurement of SCI (specular component included) and SCE (specular component excluded). Advanced Numerical Gloss Control.

Simultaneous measurement of SCI and SCE displays data on the LCD in 1.5 seconds. Unlike conventional spectrophotometers, there is no need to switch between SCI and SCE mode. This improves working efficiency, and provides stable measured data since the measurement area does not shift when the mode is switched. And also Relativity Gloss Value can be displayed by using Numerical Gloss Control.

The LCD specifications are subject to

minimizes influences of the surface condition of a sample, and is especially suitable for color quality control and Computer Color Matching.

SCE is a method in which measurements are taken excluding the specular reflection. For this reason, it provides measurement results similar to those observed

# High reliability and long life. Maintenance-free design.

The number of moving parts used in the instrument is minimized through the introduction of numerical control technology. The CM-2600d can be used with confidence, since it has been developed, manufactured and calibrated to meet ISO 9001 requirements.

World's first portable spectrophotometer equipped with instantaneous UV adjustment function. UV evaluation time has been reduced revolutionarily due to the introduction of advanced Numerical UV Control.

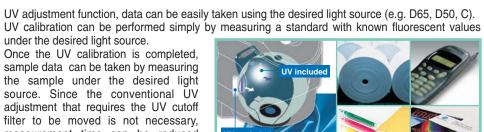

Light sources including and excluding UV component flash sequentially to provide sample data taken with UV-included energy as well as UV-excluded energy (UV400nm cutoff filter)

under the desired light source.

Once the UV calibration is completed, sample data can be taken by measuring the sample under the desired light source. Since the conventional UV adjustment that requires the UV cutoff filter to be moved is not necessary, measurement time can be reduced

(Note on UV-Adjustment : Numerical UVcalibration requires for the adjustment calculation SpectraMagic.)

Measures the target with high accuracy. Easy-to-carry stylish body with

Easy-to-carry, compact

### Color control network by spectrophotometer

High inter-instrument agreement between the portable CM-2600d spectrophotometer and the desk top CM-3000 series make it easy to build a total color control network

#### SAFETY PRECAUTIONS

To ensure correct use of the instrument, please adhere to the following.

• Before using the instrument, be sure to read the instruction manual. Always use the specified power. Use

of inappropriate power may result in afire or electric shock

The manufacturing center of Konica Minolta Sensing Inc. (Location: Aichi Pref., Japan) was approved by the British certification organization Lloyd's Register Quality Assurance for certification under the ISO 9001: 1994 international quality management system standards on March 3, 1995. Since its establishment in 1990, the center has carried out the development and production of precision instruments and associated application so for the measurement of color, light, and shape.

Certification was awarded to the center's quality management system, including design, manufacturer, management of manufacture, calibration and servicing. Certification was carried over to the ISO 9001: 2000 standards in February, 2003.

# SPECTROPHOTOMETER CM-2500d

High performance, low cost portable spectrophotometer.

# **Designed for versatility in various applications, the CM-2500d is a portable** integrating sphere spectrophotometer incorporating Numerical Gloss Control.

## Simultaneous measurement of SCI (specular component included) and SCE (specular component excluded). Advanced Numerical Gloss Control.

Simultaneous measurement of SCI and SCE displays the data on the LCD in only 1.5 seconds. Unlike conventional spectrophotometers, there is no need to mechanically switch between SCI and SCE mode. This improves working efficiency and provides stable measured data since the measurement area does not shift when the mode is switched. And also Relativity Gloss Value can be displayed by using Numerical Gloss Control.

# High reliability and long life. Maintenance-free design.

The number of moving parts in the instrument is minimized through the introduction of numerical control technology. The CM-2500d can be used with confidence, since it has been developed, manufactured and calibrated to meet ISO 9001 requirements.

# Allows measurement in any position. Compact, lightweight, with an easy-to-operate navigation wheel and large LCD display.

The battery-powered small, light body allows the instrument to be placed in any position at the sample surface.

The CM-2500d's large LCD display and its reverse display function provide easy reading, irrespective of which hand it is held in. Using your finger, the navigation wheel allows simple, user friendly operation.

( Turn) ( Push)

Promotes accurate, consistent color communication. Conforms to widely-accepted industry standards and allows measurements in all popular color spaces.

The optics use an integrating sphere to provide diffuse illumination/8-degree viewing system.

The CM-2500d conforms to all widely accepted standards including ISO, JIS, DIN, CIE and ASTM, and generates measurements in color spaces such as L\*a\*b\*, Yxv, Munsell and CMC.

The LCD specifications are subject to

- SCI is a method in which measurements are taken with the specular reflection included. For this reason, it minimizes influences of the surface condition of a sample, and is especially suitable for color quality control and
- SCF is a method in which measurements are taken excluding the specular reflection. This type of measurement provides results similar to those observed visually

Expanded LCD display (64 x 240 dots)

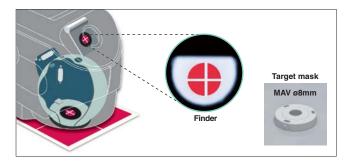

Displays large quantities of information (simultaneous display of SCI and SCE data etc.) **High-accuracy sensor** Measures at 10nm intervals for the full wavelength range. **Excellent repeatability** Illuminated viewfinder Easy-to-carry, compact and light body 670g (without batteries) **Numerical Gloss Control** Light source for specular component Light source for SCI

## Measures the target with high accuracy. Easy-to-carry stylish body with an illuminated viewfinder.

The user can choose the most suitable measurement area for the target. The easy-to-carry body with the illuminated viewfinder enables the user to position the instrument on the target quickly and accurately.
